Model: EPS4875-3U

I. Character

- 1.Input range 90-286Vac,
- 2. The parameter can be controlled by the supervisory monitoring unit through RS485.
- 3.It features input over/under voltage protection, output over current protection, output overvoltage protection, output short circuit protection
- 4. Module support hot plug,2+1 redundancy and current sharing
- 5. Wide working temperature range (- 20 $^{\circ}$ C \sim 55 $^{\circ}$ C)
- 6. High efficiency, long life and high reliability

II. Main Specifications

Model	Output Voltage Range (V)	Output Current Range (A)	Ripple(p-p) (Rated Load, Width Limited20MHz)
EPS4875-3U	48 ± 0.25 V	0—75	200mV

III. Quoted Standards

GB/T 2423.1-2001 Environmental testing for electric and electronic products—Part 2: Test methods—Tests A: Cold

GB/T 2423.2-2001 Environmental testing for electric and electronic products—Part 2: Test methods—Tests B: Dry heat

GB/T 2423.3-1993 Basic environmental testing procedures for electric and electronic products Test Ca: Damp heat, steady state

GB/T 2423.4.1993 Basic environmental testing procedures for electric and electronic products Test Db: Damp heat, cyclic

GB/T 2423.5-1995 Environmental testing for electric and electronic products—Part 2: Test methods —Tests Ea and guidance: Shock

powerld Model: EPS4875-3U Version: S01

GB/T 2423.6-1995 Environmental testing for electric and electronic products—Part 2: Test methods —Tests Ea and guidance: Bump

GB/T 2423.8-1995 Environmental testing for electric and electronic products—Part 2: Test methods —Tests Ed and guidance: Free drop

GB/T 2423.10-1995 Environmental testing for electric and electronic products—Part 2: Test methods —Tests Fc and guidance: Vibration (Sinusoidal)

GB/T 2423.11-1997 Environmental testing for electric and electronic products—Part 2: Test methods —Tests Fd and guidance: Random vibration wide band—General requirements

GB/T 2423.22-2002 Environmental testing for electric and electronic products—Part 2: Test methods —Tests N: Change of temperature

GB/T 14508-93 Mechanical environmental conditions existing in the cargo transportation by classed highway EN55022: 1998 Information technology equipment—Radio disturbance characteristics—Limits and methods of measurement

EN55024: 1998 Information technology equipment—Immunity characteristics—Limits and methods of measurement

CEI IEC 61000-4-2 2001 Electromagnetic compatibility—Testing and measurement techniques—Electrostatic discharge immunity test

CEI IEC 61000-4-3 2002 Electromagnetic compatibility—Testing and measurement techniques—Radiated, radio frequency, electromagnetic field immunity test

CEI IEC 61000-4-4 1998 Electromagnetic compatibility—Testing and measurement techniques—Electrical fast transient/burst immunity test

CEI IEC 61000-4-5 1999 Electromagnetic compatibility—Testing and measurement techniques—Surge immunity test

CEI IEC 61000-4-6 2001 Electromagnetic compatibility—Testing and measurement techniques—Immunity to conducted disturbances, induced by radio-frequency fields

CEI IEC 61000-4-8 1993 Electromagnetic compatibility—Testing and measurement techniques—Power frequency magnetic field immunity test

CEI IEC 61000-4-11 1994 Electromagnetic compatibility—Testing and measurement techniques—Voltage dips short interruptions and voltage variations immunity test

CEI IEC 61000-4-29 2000 Electromagnetic compatibility—Testing and measurement techniques—Voltage dips short interruptions and voltage variations on DC input port immunity test

IEC 61000-3-2 2001 Electromagnetic compatibility—Limits for harmonic current emissions (equipment input current≤16A per phase)

IEC 61000-3-3 1995 Electromagnetic compatibility—Limitation of voltage fluctuations and flicker in low voltage supply systems for equipment with rated current<16A

GB4943-2001 Safety of information technology equipment

YD/T 282-2000 General reliability test methods for communication equipment

GB/T 13722-92 Performance requirements and testing methods for power supplies used in the mobile communication

YD/T 732-95 Methods of measurement for DC-DC converter used in communications

YD/T 731-2002 High Frequency Switch-mode Rectifier for Telecommunication

IV. Environmental Conditions

No.	Items	Technical Specifications	Unit	Remarks
1	Operating Temperature	-20 — +55	$^{\circ}$	Full load
2	Storage Temperature	-40 +70	$^{\circ}$	
3	Relative Humidity	5—95	%	No condensation
4	Altitude	0-5000	m	derate 1°C with every 200 meters' rising at 2000-5000m
5	Cooling	Forced cooling, Draw air from the front and exhausts heat from the behind and this module has temperature-sensing timing function.		

V. Electrical Characteristics

No.	Item	Technical Requirement	Unit	Remark			
1. Input	1. Input Characteristics						
	Rated input voltage	200—240		Max AC input voltage			
1.1	AC Input voltage range	90—286	Vac	310VAC(static state),no damage to the unit for long time			
1. 2	Frequency	45—65(typical 50/60)	Hz				
1. 3	Power factor	≥0.99		Rated input, rated load			
1.4	Power transformation point	160–175	Vac	The details refer to power transform characteristic curve diagram			
1.5	Max input current	≤30 A Low voltage full load		Low voltage full load			
1.6	Inrush current	€30	A	220Vac			
2. Outp	2. Output Characteristics						
2. 1	Rated output voltage	48±0.25	Vdc	Input 220Vac			
2. 2	Output power	3600	W	175—286Vac input			

Version: S01 90—174Vac input W 1800 220Vac/rated load current 2.3 Efficiency ≥89% 2.4 $\leq \pm 0.02$ $\%/^{\circ}$ C Temperature coefficient Oscillograph band width is 10u+104 2.5 Ripple and noise ≤200 mVp-p20MHz.Parallel Capacitor with probe 0 VDC from rated input 2.6 S ≤8 Starting up output delay voltage to 42 VDC Turn on/off overshoot 2.7 $\leq \pm 5$ amplitude Load change at Overshoot $\triangle V$: $\leq \pm 5$ % 25%—50%—25% or range 50%—75%—50%, Dynamic 2.8 jumping rate is 0.1A/us; response Recovery and the jumping period is μS ∆t: ≤200 time 4ms; the two half periods are the same Combined regulation $\leq \pm 1\%$ 2.9 Current sharing At the range of $50 \sim 100\%$ $\leq +5\%$ % 2.10 imbalance load 500 Rated input, rated load The output rise time Ms 2.11 3. Protection Characteristics Input under voltage ≤85 3. 1 Vac Can auto recover, protection point Input under voltage The return difference ≥ 3.2 ≤88 Vac recovery point Can auto recover Input over voltage 3.3 Output Current 0A (Test by ≥312 Vac protection AC SOURCE+ booster) Input over voltage The return difference ≥ 3.4 ≥ 302 Vac recovery point Input over current The AC input L and N wire 3.5 have fuse protection Output over voltage 3.6 Vdc Constant voltage 50.5—52.55 protection point Output current limit 3.7 A Can auto recover 76.5≤I≤84 protection point Endure long time short circuit without 3.8 Short circuit protection

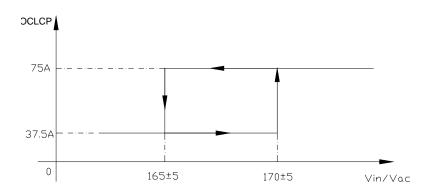

Model: EPS4875-3U

damage and auto recover.

powerld Model: EPS4875-3U Version: S01

		The module will hiccup 5 minutes before it locked itself.	
3. 9	Over temperature	Auto-recoverable when temperature is	
3. 3	protection	less than 65°C	

1. Power convert characteristics curve

VI. Other Requirement

No.	Item	Requirement	Remark
1	Acoustics noise	≤55dB	A-weighted, test distance is 1 meter
2	Smell requirement	Can't generate peculiar smell and unhealthy smell	
3	Component requirement	All components meet derating requirement The rated temperature of electrolytic capacitance ≥ 105°C, and the electrolytic capacitance has 10 years life span in 40°C sealed environment.	
4	Hot swap	Hot swap The rectifier meet the hot swap requirement	
5	Failure Isolation After the rectifier failure, it can detach from the system reliably.		
	Environment	Meet 2002/95/EC;	
6	protection requirement	No cadmium, hydrid and fluorid; can't send out organic Compound; no asbestos; the package material is recoverable.	

VII. Safety & EMC

No.	Item		Criterions	Remark
		Input-output	4242Vdc/10mA/ 1min	
1	Dialectical strength	Input-ground	2121Vdc/10mA/ 1min	No flyover, no breakdown.
	suengui	Output-ground	700Vdc/10mA/ 1min	
		Input-output	≥10MΩ@500Vdc	
2	Isolation resistance	Input-ground	≥10MΩ@500Vdc	Under normal air pressure, humidity 90%,
		Output-ground	≥10MΩ@500Vdc	
3	Touch curre	nt (Input-ground)	≤3.5mA	264Vac/60Hz
4	EMC	CE	CLASS A (3 db margin)	EN55022
		RE	CLASS A (3 db margin)	EN55022
		EFT	LEVEL 3 B	IEC61000-4-4
		SURGE	LEVEL 4 B (difference mode2KV, common mode 4KV)	IEC61000-4-5
		DIP	Drop to 70%UT, duration 100ms, at angle of 0°,45°,90°,135°,180°,225°,270°,315°, meeting class B. Drop to 40%UT, duration 20ms, at angle of 0°,45°,90°,135°,180°,225°,270°,315°, meeting class B. Drop to 0%UT, duration 10ms, at angle of 0°,45°,90°,135°,180°,225°,270°,315°, meeting class B. Under other testing conditions all meeting class B.	IEC61000-4-11
		ESD	For the shell which would be touched by human in the normal operation: IEC61000-4-2, contact discharge +/-6KV; air discharge+/-8KV standard B; (Power on when in test) For the shell which would be touched by human in the normal operation, contact discharge+/-8KV; air contact +/-10KV standard R. (power off when in test) Signal terminal: contact discharge+/-2KV standard R; (power on in test, no test conducted to the Ground wire and current sharing wire)	IEC61000-4-2
		CS	LEVEL 3 A	IEC61000-4-6

		RS	LEVEL 3 A	IEC61000-4-3
		Voltage	PST≤1.0;P1t≤0.65;relative voltage DC	
		fluctuation	wave≤3%; The max DC wave ≤4%. The time	IEC61000-3-3
		and flicker	of d (t) \geq 3% is no more than 200mS.	
	Current	CLASS A	IEC 61000-3-2 [6]	
		harmonic	CLASS A	1EC 01000-3-2 [0]

Performance criterion:

Criterion A: Performance is normal when meet the technical requirements;

Criterion B(DIP test criterion): The performance that can recover automatically when function degrade or lost temporarily;

Criterion B (other test criterion except DIP): The performance that can recover automatically when function degrade or lost temporarily; But in the test, the output voltage must be kept in normal range.

Criterion C: auto-recover for short time function interruption allowable, long time of function interruption and recovery by hand script unallowable;

Criterion R: Any components damage except protection components unallowable, the testing pieces' performance can recover when replaces the damaged protection components.

VIII. Logical function and signal

No.	Item	Technique requirement
		Indication light on the front board(green): The light is off when commercial
1	Input mode indication	electricity is unavailable (no AC input, AC over voltage, under voltage), output
		unavailable, otherwise the light is on.
		Indication light on the front board (yellow): The light is on over temperature
2	Protection indication	protection, AC over voltage,AC under voltage,over circuit;The light is wink
		when communication break off for one minutes, otherwise the light is off
0	Rectifier failure	Indication light on the front board (red): The light is on when overvoltage
3	indication	output, no output, fan failure, short circuit, otherwise the light is off.

IX. Environmental Testing Condition

No.	Item	Criterions	Remark
1	High temp	55°C	Performance is normal for
1 0	operation		24 hours
9	Low temp	−20°C	Performance is normal for
2	operation	-20 C	24 hours

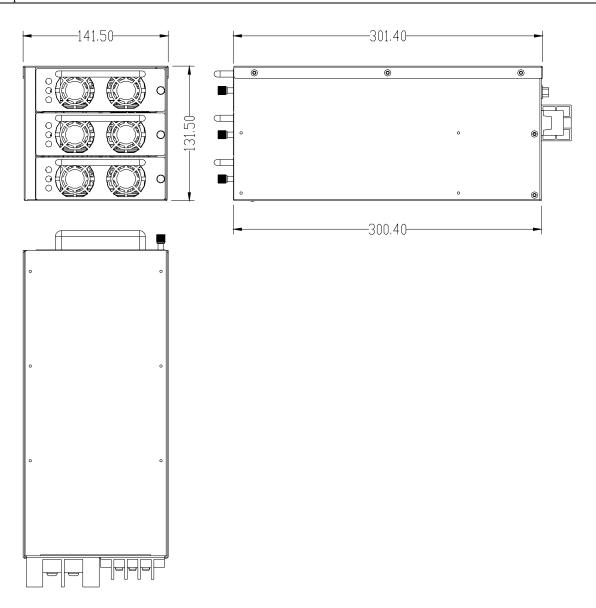

powerld Model: EPS4875-3U Version: S01 www.powerld.com

0	High temp	5000	Normal mode available
3	storage	70℃	after two hours' recovery
4	Low temp	Low temp	Normal mode availabe
4	storage	-40 °C	after two hours' recovery
5	Vibration	Sine wave: 5~9Hz: Vibration altitude 3.5mm; 9~200Hz: Acceleration 10m/s2; 3 axis, sweep frequency vibrate for 5 times for each direction, 1OCT/min (1 time sound interval/min) Random vibration: 2~10Hz: 10m2/s3; 10~200Hz: 3m2/s3; 200~500Hz: 1m2/s3; 3 axis, 30min for each direction	Environment condition Reference standard: ETS300019-2 Transportation environment condition Reference standard: ETS300019-2
6	Shock	Acceleration 250m/s2; pulse width 6ms; 3 axis 6 sides, each 500times Acceleration 250m/s2; Pulse width 6ms; 3 axis 6 sides, each 500times	Using environment condition Reference standard : ETS300019-2 Transportation environment condition Reference standard : ETS300019-2
7	Drop	Height 1m; bottom side once	

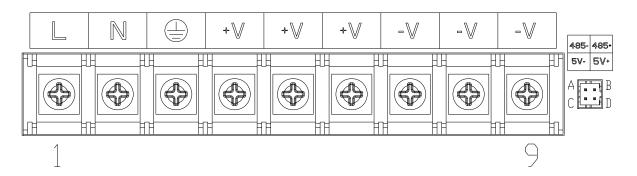

X. Mechanical Characteristics and Connector Definition

10.1 outline dimension (unit: mm)

L*W*H=301.4mm \times 141.5mm \times 131.5mm

10. 2 Output connectors and PIN

Power system backplane use terminal connector, as shown below (from left to right for 1 to 9 feet)

PIN definition:

PIN	Function	Remark		
1	L	Fire line		
2	N	Null line		
3	PE	Protection ground		
4.5.6	V+	Positive pole		
7.8.9	V-	Negative pole		
The signal pin definit	The signal pin definition			
A	485-	RS485 communication line, isolation inside		
В	485+			
С	5V-	From the outside for 5 v power supply, to power a RS485		
D	5V+	communication with the module output isolation chip		

XI. Reliability Requirements

- 11.1 MTBF: (standard, environment temperature, load requirement): according to high-class products requirement of communication rectifier equipment stipulated by ministry of posts and Tele communication YD/T682-94, MTBF (mean time between failures) \geq 150, 000 h. The product can endure environment change, such as over load, overheating, abrupt change of voltage .
- 11. 2 Component: Famous brands were selected and derating was done to the electric stress and temperature stress, anti-instant change design was done to the critical component so as to ensure the reliability of the component.
- 11. 3 Thermal design: Forced air-cooling system design and reasonable layout of component ensure the least temperature rise.
- 11.4 High endurance of Environment Design: Product meets requirements of different environments. It meets different of temperature and humility environments .Storage temperature should be -40°C—+70°C, operational temperature -20 \sim 55°C.
- 11. 5 Electromagnetism immunity: The complexity of the power source network has been evaluated in the design of the power unit. Many methods have been designed to improve its immunity.

XII. Remarks

Dangerous power output, keep safe space when in operation!

High Temperature Alarm Label
